Note: These figures are based on the revenues paid into the Colorado Wine Industry Development Fund during a fiscal year, July-June: $\$ 0.01 / l i t e r$ on all wine sold in the state, $\$ 0.05-0.01 /$ liter (sliding scale) on Colorado wine and $\$ 10 /$ ton of fruit used by Colorado wineries to make wine. These revenues are collected by the Colorado Dept. of Revenue.

The CO Dept. of Revenue will only make public the statewide volume of wine and a total dollar figure of taxes collected. Consequently, the retail bottle comparisons above are based on average bottle prices--an educated guess at sales figures, nothing more. No more concrete data is available.

Each winery reports the CO wine liters when it moves product out of bonded storage, as defined by the federal government. For some wineries, that indicates sales to consumer, retailer or wholesaler. For others that means moving wine from the production area into case storage. It is not, unfortunately, a completely accurate account for either sales or production. It is, however, a consistent figure for comparison of one year to the next and a good indicator of sales and production.

CO wine liters are broken down by region, defined around the federally designated Grand Valley American Viticultural Area along the Colorado River between Palisade and Grand Junction, for purposes of CO Revised Statute 35-29.5-103 (2)(b). The Colorado Wine Industry Development Fund and the Type I board that administers it are created and defined by Title 35, Section 29.5 of the CRS. These statutes can be found on the CWIDB page of http://www.coloradowine.com. Look under "Info: Industry."
